We can help your District mitigate the implications of COVID-19

ENGINEERS HHSDR ARCHITECTS

Our 360° approach will produce solutions to improve air flow in your buildings for ALL.

Contact us to determine if your building is a candidate for improving air quality by:

- Optimizing HVAC equipment operation
- Increasing outside air capabilities
- Installation of bacteria killing UV lights
- Ionization of air to assist in germ killing

Our services include;

- Evaluating your ventilation systems
- Making recommendations for improvements to air quality
- Overseeing changes to air circulation equipment
